Magic Leap 1 AR Glasses

The Magic Leap 1 augmented reality headset brings digital objects into the real world. The device scans the surroundings and creates a three-dimensional map to interact with the environment. Thus, the Magic Leap 1 headset can be used for training and allows trainees to learn under realistic conditions.

AR glasses with high resolution 120 HZ display

The headset is equipped with 8GB Ram and 12 GB of internal memory. The display has a resolution of 1280 x 960 on each eye at a refresh rate of 120 HZ, which ensures a smooth picture. The necessary graphics performance is provided by an Nvidia Pascal graphics unit with 256 CUDA cores. The field of view is 50 degrees, which is on par with comparable augmented reality glasses. Motion tracking is handled by a 6DoF controller. Hand and eye movements can also be tracked. Alternatively, voice recognition is also available.

Magic Leap 1 with long battery life and low weight

The integrated lithium-ion battery provides enough power for 3 – 3.5 hours of operation. The battery as well as the RAM and internal storage are connected to the AR glasses via the included Lightpack. Nevertheless, the total weight of the Magic Leap 1 AR glasses is only 315 grams, which makes them comfortable to wear for longer periods of time. The AR glasses can be integrated into the company network via Bluetooth or.
